ORDER

No. 459/PA to DG/EPA/2026:

2. **AND WHEREAS**, vide this office letter **No. 51/PA/DG/EPA/2024 dated 06.05.2024**, installation of Emission Control Systems (ECS) and CCTV cameras with provision of live feed of industrial stacks was made mandatory to enable real-time monitoring and remote verification of environmental compliance, thereby strengthening enforcement and reducing reliance on subjective inspections;

3. **AND WHEREAS**, vide this office **Executive Order No. 226/PA/DG/EPA/2025 dated 14.03.2025**, it was made mandatory that all inspections conducted through the Eco-Watch App shall include the Unique Identification (ID) Number of the inspected unit, in order to ensure traceability, standardized data recording, and audit-ready compliance documentation;

5. **AND WHEREAS**, Compliance Status Reports submitted to the Environmental Protection Agency form the basis for issuance of confirmation of compliance and for regulatory and enforcement decisions, the credibility and reliability whereof necessarily depend upon objective verification, live monitoring, and traceable identification of the concerned unit;

7. **AND WHEREAS**, in the absence of live CCTV feed and a verified Unique Identification (ID) Number, Compliance Status Reports cannot be independently validated or reliably relied upon for regulatory decision-making, which undermines transparency, accountability, and effective institutional control.
