AQI limits of EPA, Punjab

|         |                               |
|---------|-------------------------------|
| 0-50    | Good                          |
| 51-100  | Satisfactory                  |
| 101-150 | Moderate                      |
| 151-200 | Unhealthy for sensitive group |
| 201-300 | Unhealthy                     |
| 301-400 | Very unhealthy                |
| 401-500 | Hazardous                     |

Note: i. The mobile van is parked at Kot Lakhpat Industrial Area, Lahore.

ii. The report prepared based on instruments generated data and AQI of Lahore calculated based on revised breakpoints of EPA Punjab.

iii. At present, the concentrations of respirable fine dust particles and Oxides of nitrogen is exceeding the standards of environment protection department which is mainly contributing to the air pollution and high AQI. The data pattern shows automobile emission is major contributory in raised air pollution.
